Forecast for Sunday 27 Feb 2022

Weather: Fine for much of the day with largely unbroken sunshine, although a notable chill in the strong breeze, especially at height. Cloud will thicken from the west during the late afternoon and evening, descending onto the higher slopes.

Chance of cloud-free hill tops above 600m: Near 100%. Becoming 80% in evening.

Low cloud and visibility: Good or very good views for much of the day. Falling to be very poor on some higher tops during the evening, with cloud forming on hills above 700m by midnight.

Meteorologist's View

Very isolated gusts could approach gale force on highest summits and ridges, leading to a notable wind chill.

Forecast for Monday 28 Feb 2022

Weather: Overcast with outbreaks of rain and drizzle at first becoming heavy and persistent by late morning. Rain only gradually clearing though the late afternoon and evening with clear skies developing by midnight.

Maximum wind: Southwest mean 35mph with gusts 40-50mph, decreasing gradually from mid-morning to Northwesterly 20-25mph

Chance of cloud-free hill tops 600m: 20% increasing after dusk to 80% by midnight.

Low cloud and visibility: Moderate to poor for much of the day, with most hills above 700m obscured, and some western slopes seeing cloud obscuring routes down to 400m. Rain and drizzle will also limit views from lower levels. This improving to mostly good during the evening, with only isolated patches of cloud persisting around 800m

Temperature: **Valleys:** Plus 3 Celsius rising to Plus 12 Celsius by midday, but falling to Plus 8 Celsius after dusk
At 600m: Plus 5 Celsius falling to Plus 2 Celsius after dusk.
Freezing level: Above the summits.
